WATER WORKS FOR FERGUSON

W. E. Pool Is Constructing a New Water System.

AMPLE PROTECTION FROM FIRE

Would Take Two Hours for a Four Inch Pipe to Drain the Reservoir.

The citizens of Ferguson have shown commendable enterprise in the past in providing for themselves a supply of fresh water from the springs above town and carried to the buildings by pipes. This has worked very satisfactorily until lately when the water has got bad on account of the pipes having rusted. This would not have occurred had the fall been greater and the pipes larger, but it was expensive getting in piping and it was thought that what was put in would answer the purpose till such time as a proper system was installed. However, the time is at hand for the town to get the regular system. Mr. Pool wanted water in his new dwelling and also in the Great Western block and went about having a private waterworks put in, but most of the business men and others wanted Mr. Pool to instal waterworks sufficiently large to supply the whole town, as a much better service could be obtained by having the whole thing in one. So Mr. Pool decided to abandon the private scheme and do as the people had asked. He therefore secured a water right at the source of the springs above the hospital and had a gang of men to work for a week. Already a large substantial reservoir has been built, the earth and wash were dug away, down to bedrock and a strong dam built. A ditch fifteen inches deep is completed from the reservoir to Victoria avenue in which will be placed the main pipe. The main will be four inches in diameter inside and the altitude of the reservoir from the main street is about 250 feet and the length of the main down to town is between 1,500 and 2,000 feet. It will therefore be seen that there is ample fall to insure a head of water that will throw a stream over, any building in town. This will prove of incalculable value in case of fire and we believe that when the system is complete the insurance rate will be lowered in Ferguson, and there is certainly room for a decrease. Two inch and one and a half inch pipes will carry water from the main to different parts of the town and Mr. Pool states that as low a rate, for water, as possible will be given so that every house in town may be supplied.

The reservoir is not far up the hill from the hospital and is surrounded by large fir and cedar trees, which prevent the sun from striking down on the water and will make a cool place to sit at a warm afternoon. This water is nine feet deep in the deepest part and runs out of the rocks only a few feet away. It has been figured that in case of fire it would take two hours to drain the reservoir, even were the stream above not continually feeding it. So there is not much danger of the water running short. When the demand becomes too great for the supply there is another spring creek only a short distance away that could easily be made a feeder for the reservoir.

LORD KITCHENER RECEIVES AN ENTHUSIASTIC RECEPTION

London, July 12.—Lord Kitchener arrived at Paddington station at 12:40, and was welcomed by the Prince of Wales and greeted by cheering crowds. An address was presented to the general and he shortly after started for St. James' Palace. He arrived at St. James' Palace at 1:27 p. m. The Prince of Wales was already there awaiting him.

Lord Kitchener's progress through the metropolis after three years' absence at the Boer war, was one of the most memorable of the many remarkable of the past three years. From the moment he set foot in London till the time of his disappearance beneath the portal of St. James' Palace he was the object of such an outburst of popular enthusiasm as to quite overshadow the demonstrations on previous similar occasions.

Later Lord Kitchener proceeded to Buckingham Palace as the king had expressed a desire to see him. Lord Kitchener was speedily conducted to the king's sick chamber, and His Majesty, from his couch, extended a warm welcome to him, and personally expressed his thanks for the termination of hostilities. The king then presented Lord Kitchener with the decoration of the new order of merit. The gen-

eral next saw the queen, after which he drove to Lord Roberts residence in Portland Place. Lord Kitchener will visit Mr. Chamberlain, the colonial secretary, Monday.

Columns of anecdotes concerning General Kitchener and voluminous descriptions of his life and especially his recent campaign in South Africa, monopolize the newspapers and the coronation arches, which were being torn down, are now redecorated in his honor. General French also comes in for many eulogiums.

Before long, however, the men who ended the South African war are likely to appear in a new role, and one less pleasant to the popular taste. The royal commission to investigate the conditions of the war is being formed. Viscount Goschen, ex-chancellor of the exchequer, and an ex-first lord of the admiralty, will be its president, and Lord Kitchener will doubtless be examined at length.

Southampton, July 12.—The Pacific Steam Navigation Co.'s steamer Orotava, which left Capetown on June 23, with Lord Kitchener and staff on board, arrived here at half past eight o'clock this morning. Owing to the fact that Major Gordon, who was also a passenger on the steamer, had been stricken with smallpox, Lord Kitchener and his staff only were allowed to land. The Orotava has been placed in quarantine.

Lord Kitchener landed at 9:15 a. m. He was accorded a welcome from a huge throng of people. After a brief official reception at the docks, the general was driven through the decorated and crowded streets to Hartly Hall, where he was presented with an address from the chamber of commerce, expressing admiration of the generalship, resource and skill which he had shown in South Africa, and hoping that the peace which he had secured would be lasting and mark the beginning of a new epoch of prosperity and commercial development throughout the empire.

In reply, Lord Kitchener declared that whatever success had been achieved was due to the rank and file of the army. He thanked those who had looked after the friends and relatives of those left behind in South Africa.

In response to clamorous calls for General French and General Ian Hamilton, they also spoke, the former remarking that they had throughout been inspired by the example of their chiefs.

The freedom of the borough was conferred on Lord Kitchener, and the party was then obliged to hurry away in order to meet their London engagements. The progress of Lord Kitchener and his companions to the railroad station was marked by scenes of remarkable enthusiasm.

ANOTHER IMPORTANT STRIKE MADE ON THE SILVER CUP

On Monday Foreman Bariboo of the Silver Cup mine had a look on his physiognomy that betokened pleasure and satisfaction. It was soon learned that another important strike had been made in the mine. Some time since six feet of solid galena was encountered in No. 12 drift, particulars of which were reported by the Eagle. This body of ore being found in an unexpected place made the mine worth fully half as much again for this added a great many more tons of ore to the amount in sight. It insures a body of

ore from 4 to 6 feet in width and 104 feet in depth for stoping. The new find is in No. 11 drift and is of more value to the mine than the previous strike for while it is but three feet in width it is solid grey copper of a quality equal to anything previously found in the mine.

No. 5 drift is also looking good and No. 4 is better than ever. In No. 1 the body of ore is narrow, but is solid grey copper and is so rich that it is not sent down the chute, but is sacked in the stope, thus preventing any loss. It

takes but a very small piece of this ore to weigh a pound and every pound is worth a dollar in gold, so it pays to be careful of the stuff.

Supt. Crilly was up to the mine Tuesday and when the Eagle representative met him Wednesday he seemed very pleased at the way the development in the Cup is turning out. All our work on the Cup, said Mr. Crilly, since the Pool-Young syndicate took over the mine has proven satisfactory even beyond our most sanguine hopes. The syndicate thought they had a good property, but they had not hoped that it contained the volume of ore that is being continually encountered.

Lardo Branch Railway.
W. Downie, superintendent of railways and steamers in the Kootenay division of the C. P. R., arrived in Trout Lake on Thursday last and spent Friday in town leaving on Saturday morning for Nelson on the Lardo branch. His presence in Trout Lake was due directly to an article in last week's Topic criticising the C. P. R. for the abrupt cutting off of all freight privileges which had been allowed for the past month or so over the new branch of railway. Speaking to the Topic Mr. Downie said it was not the intention of the C. P. R. to cause the public annoyance in any way, they wished to further the interests of the people in this section by every means in their power and certainly Mr. Downie's words are borne out by his prompt acquiescence into the grievance of the Lardo people, mentioned in the last issue of the Topic. He left assuring the merchants and others who had goods and supplies held up by the rather unreasonable action of the construction

department, that their freight would be sent through without any further delay. That Mr. Downie has the thanks of the community for his prompt attention to the wishes of the public goes without saying and his kindling action will remove entirely any feeling of irritation occasioned by what after all may have been a mistake on the part of the local officials.

Asked as to when the operating department would take over the railway, Mr. Downie said that he had been informed by Mr. Sullivan, the divisional engineer in charge, after his party had inspected the line, about ten days ago, that there remained nothing now but the government inspection and he expected that a fortnight's time would witness the transfer of the completed branch from the construction to the operating department, this would place the opening of the new line to passenger traffic some time this week.

Continuing, Mr. Downie said he had just returned from the Coast where he had been arranging the time table which would govern the new road. He said for the time being the present

would be a tri-weekly service, trains running Mondays, Wednesdays and Fridays, this could be increased if exigencies of traffic required it. The lake service between Grand and Trout Lake would be arranged, he thought, with the S. S. Victoria, whether by purchase, lease or running arrangement he was unable to say just now as there was nothing conclusive. This would remain good for the current year.

Regarding an express office at Trout Lake Mr. Downie said there would be no difficulty as far as the C. P. R. was concerned and he had no doubts but that the Express Co. would see the necessity for the arrangement of such a service as was informed by everybody that there was a large amount of this business transacted in the Lardo which would be very materially increased were the necessary facilities placed within easy reach of the community.—Topic.

New Process.

A new process has been put in operation in Missouri by which bricks are manufactured from sand and cement.

TALK ABOUT FISH CREEK

A Citizen of Ferguson Visited the Camp This Week.

WAS AGREEABLY IMPRESSED

Thinks South Africa May Look to Its Laurels as a Gold Producing Region.

"I wish to say," said a party recently returned from Camborne to a representative of the Eagle, who interviewed him, "that I think highly of the prospects of Fish Creek and its vicinity. I expected to see marked evidence of a boom in Camborne, but saw little or no trace of it. There is quite a rush in building certainly, but beyond this nothing very particular is noticeable; if I make exception of the presence of certain very astute, and clever Americans who have practically settled down here watching carefully for what personal inspection and observation may put in their way. Some of them have allied themselves with men who know the country whose brains they are using with a view to investment in the near future. There is no fresh capital in actual sight that I heard of."

"Putting aside the existence of gold, and minerals generally which are there in large quantities, Camborne is bound to be a good camp owing to the splendid land in Fish River valley. When cleared of timber and brush this will be an ideal farming district."

"The quartz leads are wonderfully strong, and well defined. They are everywhere — a perfect network of them. If they carry values in proportion of one lead in twenty, then South Africa may look to its laurels as a gold producing region. One Oyster may bear a pearl of price, but every prospect is not a pearl reef."

"Everyone agrees on one point however, and that is this: Mr. W. E. Pool is looked upon as the maker of the Lardeau. To him more than any one, or anything, not excepting even the existence of gold quartz, no matter how abundant, is attributed the plunge forward which the reputation of the district has achieved."

"Ferguson and Fish Creek will never clash. Each is assured of success along different lines, but when I measure their splendid chances for the future with the abjectness of other places I think I see in what direction the tide of prosperity is plainly tending."

"Yes, I think a great camp will be seen in Camborne, though I do not think its day has dawned entirely yet."

The new method is said to have several advantages over the process which has hitherto been in operation. No ovens or burning processes are necessary, the hardening of the brick beginning as soon as it is taken from the mould, and in fifteen days it is ready for delivery. During the process of moulding single brick undergoes the pressure of 65,000 pounds. In thirty days from the time the hardening process begins, the brick will stand a pressure of ten tons; in sixty days a pressure of twenty tons.—Winnipeg Telegram.

Work for Thousands.

Canada should smelt its own ores, make all its pulp into paper, and coin all its own money. This would mean work for many thousands, and millions of money for the country.—The Ledger.

FRIDAY, JULY 18, 1902.

MATTERS POLITICAL.

The Rossland Miner of the 11th inst. has an article on Joseph Martin, M. L. A., and states in part that Mr. Martin is of opinion that there is bound to be a general election in the province before another session of the legislature convenes. He takes this view of the situation on the ground that the government cannot hope to face the house with a majority at next session. As a government supporter Mr. Martin's opinion on this particular point should carry weight.

He states that the delays in the last session of the house were not caused by the desire of opposition members to hamper the transaction of business, but by the entire lack of preparation by the government and the slowness they manifested in bringing down legislation. The reason for this was the government did not know where it stood at any stage of the political game, particularly on the railroad bills. Mr. Martin takes upon himself the credit for having bowled out the Canadian Northern land grant.

The ex-premier does not think much of the personnel of the provincial cabinet. He is said to have made the statement that Mr. Denismuir was the only man of honor in the cabinet; any of the other members would pledge themselves in the morning and go back on the pledge before night.

Party lines in the next provincial general election is Mr. Martin's panacea for the legislative ills that have beset British Columbia. Asked what part the labor party might be expected to play in a contest on party lines, Mr. Martin expressed the opinion that one or other party must join hands with the labor men and make a straight issue in the campaign.

EDITORIAL NOTES.

As a result of the strike among the coal miners in the Crow's Nest company's properties, 800 miners in the Boundary district are out of employment. The smelters there are without the necessary coke with which to treat the ore and shipments have consequently ceased. Unless the differences are speedily settled, other smelters will be affected and the mining industry will be at a positive standstill. The influences of the strike are becoming general and every section of the interior will suffer.

The incident serves to impress, more forcibly than ever, the disastrous consequences attendant upon the monopoly of the coal supply, and to avoid like occurrences in fu-

ture, the government should act upon the necessity of opening the 50,000 acres of land on Morrissey creek by a competing company.—Trail Creek News.

Building operations are retarded in Ferguson by a scarcity of builders. It seems peculiar that carpenters do not come in when in most other lines of work there are more men than the demand calls for. At the present rate of progress it will be winter before the buildings now contracted for may be hoped to be ready for occupancy.

We know of at least four families who want houses and hope to reside permanently in Ferguson, but have no hope of getting houses to live in. The sawmill men assure us that they can meet any reasonable demand for lumber from this out, so what is wanted is a few more good carpenters.

In the latest Kootenay Mail to hand we noticed the following local paragraph: "Chinese laundrymen are forming a syndicate to acquire from W. Fleming the Revelstoke steam laundry." Revelstoke is a town whose people are composed largely of railway men and others who earn a livelihood by the sweat of their brow, and as such should see that by employing Oriental labor they are not conserving the interests of themselves or their fellow white laborers. Mr. Fleming has been

running a steam laundry in Revelstoke for several years, but did not get what he thought was a consistent support from the townspeople. The Chinese laundries got most of the work and Mr. Fleming found it to his interest to dispose of his business.

LOCAL FIELD IN BRIEF

D. A. Dunbar made a trip to Gerrard Thursday.

J. B. Fleishman of Vancouver came into Ferguson on Monday.

Dr. Newcombe and E. S. Fullmer paid a visit to the Silver Cup on Thursday.

Judge Miller of Trout Lake and Prof. Greer of Minneapolis gave the Eagle a call on Saturday.

Doc Johnson came in from his mine Sunday and left again for the same place Monday morning.

S. Sutherland is in Nelson making arrangements for the transportation of goods via the new railroad.

Mrs. Bath and family left on Tuesday's stage for a six weeks visit to the shores of the Okanagan lake.

Parisians of the May Bee and Mrs. Parisian were in town Wednesday, returning to the mine Thursday.

The Winnipeg Telegram has a neat supplement this week with map of Manitoba and description of Winnipeg and district.

Dr. E. V. Lazler has located at Camborne. He will assist Dr. Newcombe in connection with the Miners' Union hospital in Ferguson.

Miss McDowell, lately school teacher at Comaplix and a sister of Mrs. Graham of Boston, paid a visit to Ferguson Monday returning Tuesday.

Rev. McKay of the Presbyterian church, Boston, held a service in Eagle hall Sunday evening having exchanged pulpits with Rev. S. J. Green.

James V. Reeves, watchmaker and jeweler, has removed his business to the building between Lardeau Hotel and the barber shop and is now ready to do any work entrusted to him.

J. J. McKay, a commercial traveller from Vancouver, visited town Saturday and Sunday, exhibiting his samples in the large and commodious sample room of the Windsor Hotel.

The Canadian Socialist, official organ of the Socialist organization in Canada, published by R. P. Pettipiece and G. Weston Wrigley at Vancouver is being received regularly at this office.

On Tuesday the outgoing stage was delayed by a tree having fallen across the trail between Ferguson and Beaties' Hotel. The stage had to be taken apart and lifted over the mammoth B. C. tree.

A pack train consisting of twenty head of horses and mules belonging to S. Daney and W. Smock, made a trip loaded with supplies, to the Old Gold mines Tuesday. Judge J. M. Miller is manager of the Old Gold.

Graphite is now being made artificially at Niagara Falls. The quality is excellent and pencils from the material are being made and are a commercial success. We wish they had some of the Lardeau graphite.

Report comes from Fulmers that one Jno. Galles became dependent and on Sunday attempted suicide with a razor. The police were notified and he was brought into the Lake where his wounds were dressed and he was placed in the cooler.

July 12, the two hundred and twelfth anniversary of the battle of the Boyne, passed off quietly in Ferguson. Some of the local Orangemen went out to Revelstoke to take in the big celebration. That there were a number in Ferguson who were loyal to the anniversary was evidenced, by the colors of the order, worn during the day.

Miss Lydia Kendall got her right hand burned very badly on Tuesday afternoon with a smoothing iron which was too hot for ironing purposes so she decided to try cooling it by holding it in water a short time which proved rather a serious experience. Dr. Newcombe was called in and dressed the wound which is doing as well as can be expected.

A beautiful new C. P. R. diner the "Warwick," will be placed on the Imperial Limited train very soon, probably next week. The car is now being finished in the C. P. R. shops at Hochelaga. It has the standard ranges, copper covered tables, and can seat thirty guests. A special feature of the car is that the tables are set directly in front of large windows.

Mrs. Carter and Mrs. Cummings rode down to Mrs. Anderson's today, to enjoy a feast of strawberries.

The Miners' Union hospital has grown apace in the past week. It now has the roof on and all enclosed.

J. R. Tweeddale, lately teller in the local branch of the Imperial Bank has vacated his position and gone to Missoula, Mont.

Ed. Perry went to Nakusp Tuesday and then on to Nelson to purchase from piping for the new water works system that is being put in.

Judge Miller of Trout Lake, Prof. Greer, A. F. Newton, H. C. Sharp and J. R. Simpson of Roseland, visited Ferguson, Thursday.

Bert Wetmore, son of Mr. Justice Wetmore, of Mossomin, Assia, arrived on Sunday to take the position of teller in the Imperial Bank.

Mrs. Ferguson from Phoenix arrived in town Monday to join her husband who has located here. Mr. Ferguson follows painting and paperhanging.

Mr. Joe Kirkpatrick sustained a painful accident Saturday while loading ore on his wagon at the Nettie L. mine. He is now able to be out again.

A. H. Holdich has gone to Haleyton springs to spend a week rusticing. He has not been telling well of late and we hope the change will do him good.

Lord Salisbury has retired definitely from the premiership of Great Britain. Mr. Arthur Balfour, for some years toy leader in the house of commons, is now premier.

Rev. Mr. Fisher, Presbyterian minister of Minneapolis, Minn., who is visiting in Ferguson, will conduct services in the Eagle hall Sunday at 3 o'clock for Rev. S. J. Green. An invitation is extended to all to attend.

Mr. Joseph Ryan returned Wednesday from a visit to Camborne where he has been to examine some mining property for a syndicate. He brought home a good sized box full of samples of ore from the properties visited, to be tested.

Judge J. M. Miller and Prof. Greer of the Old Gold and other mining companies operating in this camp paid the Eagle a visit Saturday last. They stated that a strike of 18 inches of solid salena mixed with grey copper had been made on the Guinea Gold.

Rev. S. J. Green is expecting his brother from Hudson Bay store, Fort Qu Appelle, next week. After paying a visit to Trout Lake Mr. Green will proceed to Nelson where he has been appointed manager of the Nelson branch of the Hudson Bay store.

Rev. Fisher of Minneapolis, Minn., and Rev. Kuhns of Columbus, Ohio, came into Ferguson Wednesday and on Thursday in company with J. C. McCrossan made a trip to the Trinne in which they are interested. Messrs. Fisher and Kuhns will remain in town some days and will witness the "blowing in" of the smelter.

F. C. Elliott, barrister of Trout Lake was in town Thursday. As district representative of the Copper Mountain syndicate, he sent a number of men to build trails to the company's claims on Surprise and Short creeks, both tributaries of the northfork of the Lardeau. This syndicate owns 18 claims on Surprise creek and 9 claims on short creek, all likely looking prospects. Mr. Elliott expects J. Langstocks, Robert Robertson and Lew. Ernst, three directors of the company, to arrive next week to look over the properties and confer regarding the season's development.
